Personal Statement

Motivated MSc Advanced Computer Science student at the University of Leeds with 3 years of prior experience as a Software Engineer in backend development and microservices. Skilled in Java, Python, and SQL, with expertise in RESTful API design, cloud technologies (AWS, Azure), and software reliability. Seeking a Graduate Software Developer role in the UK to leverage technical expertise and contribute to building scalable, high-performance applications.

Work Experience

SOFTWARE ENGINEER | Odessa Technologies | May 2022 – Sep 2024 | Bengaluru, India

- Optimized project workflows by 30% through process analysis and automation, enhancing sprint delivery and elevating team productivity.
- Reduced critical bugs by 40% within 45 days through structured code reviews, unit testing, and CI/CD validation, enhancing product reliability significantly.
- Delivered 90% of product change requests on schedule, improving client satisfaction through efficient release management and deployment automation.

SOFTWARE ENGINEER INTERN | Odessa Technologies | May 2021 – May 2022 | Bengaluru, India

- Enhanced team efficiency by 40% through coordination of cross-functional collaboration and optimization of sprint execution processes.
- Resolved critical production issues through direct client interaction and timely deployment of hotfixes, maintaining SLA compliance.
- Implemented bug fixes and feature enhancements, improving product stability by 30% and ensuring continuous delivery within Agile timelines.

Education

- **MSc Advanced Computer Science**

University of Leeds, Leeds, United Kingdom | Sep 2025 – Sep 2026 (Expected)

Relevant coursework: Algorithms, Data Science, Programming for Data Science, Advanced Software Engineering, Machine Learning, Deep Learning, Cloud Computing, Blockchain Technologies.

- **BE Computer Science and Engineering**

Bannari Amman Institute of Technology, Erode, India | Aug 2018 – May 2022

Relevant coursework: Data Structures, Software Engineering, Operating Systems, Software Testing, Design and Analysis of Algorithms, Artificial Intelligence, Machine Learning, Cybersecurity.

Projects

OBJECT DETECTION - Python | OpenCV | TensorFlow | Raspberry Pi | IoT Sensors | ML

- Developed real-time object detection algorithms in Python using OpenCV and TensorFlow, enhancing image processing and feature extraction capabilities, resulting in a 25% increase in processing efficiency.
- Deployed a model on Raspberry Pi with a high-resolution camera, achieving 30% efficiency in on-device inference and video analysis for an innovative university project.
- Integrated IoT sensors, improving data input accuracy by 60% and enhancing detection reliability and contextual awareness for a project involving 4 participants.

WEATHER BOT - MCU | Data Transmission Module | Humidity Sensors | Solar Panel and Battery

- Developed a solar-powered, low-maintenance weather monitoring station that recorded humidity, temperature, wind speed, and rainfall, enhancing data collection for environmental studies.
- Implemented cloud integration for secure data storage and remote monitoring, enhancing data accessibility by 40% through cellular and Wi-Fi connections.
- Enhanced reliability and usability by implementing sustainable power management and developing a user-friendly cloud dashboard, resulting in a 40% increase in trend analysis efficiency.

Technical Skills

- **Programming & Backend:** Java, Python, Spring Boot
- **Frontend & Frameworks:** JavaScript, HTML, CSS
- **Databases:** MySQL, Schema Design, SQL, PostgreSQL
- **Cloud & DevOps:** AWS, Azure, Git, GitHub, Docker
- **Tools & Testing:** Postman, Swagger, VS Code
